ABSTRACT:

**PURPOSE:** To obtain a low-toxicity oily ink composition having simultaneously improved drying properties of a pin point and matting resistance at high humidity while maintaining proper holograph drying properties and stability with time, containing oil-soluble dye and specific three kinds of alcoholic solvents.

**CONSTITUTION:** This composition contains (A) oil-soluble dye (e.g. oil-soluble nigrosine such as oil black), (B) propylene glycol monomethyl ether, (C) dipropylene glycol monomethyl ether and (D) tert-butyl alcohol. The whole amount of the composition preferably comprises 2-20wt.% component A, 40-80wt.% component B, 3-15wt.% component C and 7-25wt.% component D. The composition generally contains a resin such as phenolic resin or terpene resin.
